|-----------------------------------|---------------------------------------------------|
| Modello di prodotti               | A4939KLPTR-5-T                                    |
| fabbricante                       | Allegro MicroSystems, LLC.                        |
| Descrizione                       | IC MOSFET DRIVER 3PH TSSOP                        |
| Categoria                         | Circuiti integrati (CI) > PMIC-driver del motore, |
| Stato parte                       | 4518 pcs Stock                                    |
| Tensione di alimentazione -       | 5.5 V ~ 50 V                                      |
| Tensione - Carico                 | -                                                 |
| Tecnologia                        | Power MOSFET                                      |
| Contenitore dispositivo fornitore | 28-TSSOP-EP                                       |
| Risoluzione del passo             | -                                                 |
| Serie                             | -                                                 |
| imballaggio                       | Tape & Reel (TR)                                  |
| Contenitore / involucro           | 28-TSSOP (0.173", 4.40mm Width) Exposed Pad       |
| Configurazione di uscita          | Pre-Driver - Half Bridge (3)                      |
| temperatura di esercizio          | -40°C ~ 150°C (TA)                                |
| Tipo montaggio                    | Surface Mount                                     |
| Tipo di motore - Stepper          | -                                                 |
| Tipo motore - AC, DC              | Brushless DC (BLDC)                               |
| Interfaccia                       | Parallel                                          |
| Funzione                          | Controller - Commutation, Direction Management    |
| Corrente - Uscita                 | -                                                 |
| applicazioni                      | Automotive                                        |
|                                   |                                                   |
